BATTLESHIP

INSTRUCTIONS & SCHEMATICS

BY: Summer Bossman, Matthew Lozito, Isabella Katz, Justin Colon

DESCRIPTION

Two naval commanders face off in dangerous waters, hoping to sink their enemy and emerge victoriously.

INSTRUCTIONS

Once a difficulty mode has been selected on the main screen, you will be prompted to place your ships on the board.

TIP: The easy difficulty will have the computer randomly guess locations, while the hard difficulty will use an algorithm to track you down!

After placing your ships, you will take turns with the computer player, attempting to guess the location of their ships to sink them.

TIP: Commanders who look for their opponents systematically live to tell the tale!

SHIP TYPES

Carrier

5 hits to sink

Battleship

4 hits to sink

Cruiser

3 hits to sink

Submarine

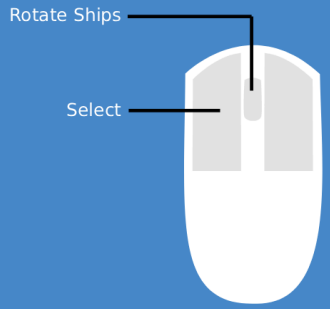
3 hits to sink

Destroyer

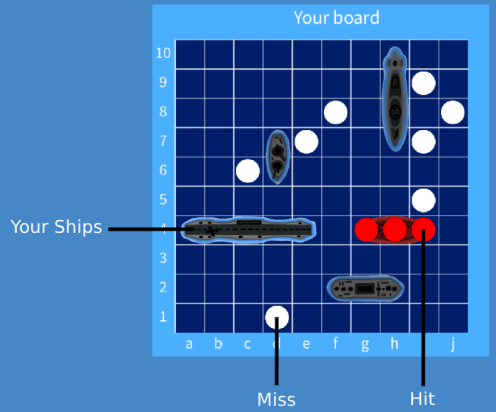
2 hits to sink

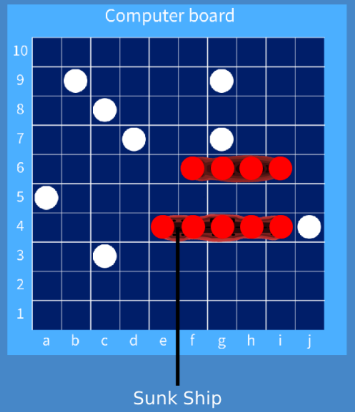
COMMANDS

You will be able to control the game using your mouse or trackpad. During setup, you can use the left button to select ships and place them on the board, and use the scroll wheel to rotate them. During the game, you can use the left button to guess enemy ships.



SCREEN OVERVIEW





The game is played on a 10x10 grid. Your board is on the left side of the screen and the opponent's board is on the right. Your sensors allow the boards to automatically update with information like hits and misses.

TIP: If you get a hit, try choosing the orthogonal squares adjacent to that location. If you get another hit, keep following that line until the enemy is sunk!
